

Metro Community Health Center

Quality Implementation Nurse

POSITION SUMMARY

The Quality Implementation Nurse will facilitate the mission of Metro Community Health Center to ensure the delivery of quality patient care and coordination of supportive services within the health center. The Registered Nurse will provide direct clinical support to an assigned provider, function as an EMR champion, and implement a patient-centered approach to all care given whether face-to-face or telephonic. The individual will administer to the needs of the patients by following the scope of practice and standards of care accurately while demonstrating a broad, comprehensive knowledge base in the theory and practice of nursing. This position utilizes the nursing process to ensure quality and cost-effective health care to patients in all stages of the lifecycle. The Quality Implementation Nurse will work independently as well as part of a team and requires a working knowledge of clinical applications.

DUTIES AND RESPONSIBILITIES

- Provide and facilitate competent health care of patients and families
- Competently telephone triage for ages 0-150 (e.g. remote assessment, medication management, community resource management, chronic disease education, plan-of-care reinforcement, discharge follow-up, etc.)
- Initiate care coordination support within the scope of Pennsylvania nursing licensure when necessary
- Use computers for accessing electronic health records for data retrieval, data entry, charting updates, etc.
- Provide health and wellness education to individuals and groups
- Provide support for initiatives designed to improve the quality of care or clinical outcomes
- Assist providers with direct patient care and procedures
- Provide in-office education for patients with newly diagnosed chronic disease
- Administer immunizations and injectable medications to patients age 0-150
- Provide face-to-face and telephonic care to patients as assigned and qualified to perform
- Assess, review, and develop nursing plans to ensure maximum patient outcomes
- Provide patient/family/caregiver teaching, education, training and counseling as needed relative to disease processes, health maintenance, ordered procedures, and counseling regarding medication and nutrition
- Complete all patient documentation and ensure all patient records are current and complete
- Provide direct care to patients as assigned and qualified to perform

- Coordinate care for patients with chronic diseases
- Assist the clerical and clinical teams with the coordination and scheduling of patients
- Assist in the education and training of staff
- Provide counsel, support, advice, and support to patients, their families and fellow employees
- Perform duties including, but not limited to, vital signs, assisting the providers with procedures, providing patient education, conduct in-office testing to include; urine pregnancy screen, urine dip, rapid strep, laboratory tests, pregnancy tests, medication refills, fecal occult blood, and HIV screening, lead testing, immunizations and other injections, as required
- Act as a resource for patients, clinical staff, and CHNs
- Explore existing patient barriers of health access, healthful behavior, and ability to successfully self-manage chronic disease, if present
- Provide patient/family/caregiver teaching, education, and counseling as needed
- Attend meetings, patient conferences, planning sessions, related to quality assurance, patient care, and other related topics as required by the health center
- Attend off-site tabling events or seminars to provide support or health education
- Attend seminars and maintain all licensure requirements for continuing education and best practices
- Participate in quality strategies to evaluate compliance with standards and to identify opportunities to improve patient outcomes
- Perform duties including, but not limited to, vital signs, assisting the clinician with procedures, providing patient instructions, and conducting in-office testing and procedures
- Support the clinical team with education and training
- Lead and drive the quality improvement/quality assurance quarterly meetings (under the management of the Clinical Director & COO) by facilitating quarterly meetings and maintaining standards by ensuring the metrics for clinical outcomes are consistently reviewed and the organization is provided clear guidance and direction affecting ongoing improvements in the quality of care. Assist the clinical team as necessary to standardize these quality assurance standards and measures
- Provide informal leadership and direction related to clinical collaborative, grant, study, program, or research related initiatives that improve the lives of our patients as well as the communities in which they live
- Provide patient education teaching and training relative to disease processes, health maintenance, ordered procedures, and counseling regarding medication and nutrition
- Other duties as assigned

EXPECTATIONS

- Balance complex clinical scenarios
