POSITION SUMMARY

The Capital Project Manager will organize, manage, and plan complex projects for the organization's research, development, and product implementation efforts.

ESSENTIAL FUNCTIONS

- Leads an interdepartmental team to complete an assigned project on time, to specifications, and with accuracy and efficiency.
- Manages and is responsible for all phases of project execution.
- Outlines the tasks involved in the project and delegates accordingly.
- Conducts cost analysis, estimating expected costs for the project.
- Prepares and implements a budget based on estimates.
- Conducts risk assessments; reports identified risks to management; provides recommendations for mitigation of risk (including termination of the project if appropriate).
- Addresses questions, concerns, and/or complaints throughout the project.
- Acts as a liaison between company, customers, and vendors.
- Manage the construction and start-up of a new, FDA regulated building.
- Anticipates and identifies areas of tactical and strategic risk and mitigates risks through early risk assessments and implementation of fallback / mitigation strategies.

[Type here]

- Serve in the role as Deputy/Senior Project Manager on a large-scale, complex project that involves multiple internal and external stakeholders.
- Communicates and collaborates with sales and marketing teams to provide training and information required to promote and sell new projects, programs, and systems.
- Ensures compliance with federal, state, local, industry, contractual, and company regulations, standards, specifications, and best practices.
- Coaches others in performing support tasks, such as writing Requests for Capital Expenditures (RCEs), safety / quality checklists, scope documents
- Performs other related duties as assigned
